

The Realms of Light Transmission 29:09:2011

Mankind is leaving behind the dark ages of life experiencing and moving into the age of light. Your soul light quotient is undergoing a recalibration in frequencies of vibration. This new age has been dawning for generations as mankind's rebooting has gathered momentum.

In truth your soul is recalibrating your physical body in conjunction with Creator Source via Galactic core and in correlation with Gaia the Planet Earth.

We in the Realms of Light salute you humanity in your re awakening to and remembering of your magnificence.

Your magnificence is beyond your conscious ability to comprehend yet in reality of light frequency within the soul – that which you are of the Creator, can be likened to a light bulb that is connected to the current and awaits the throwing of the switch to activate the true light - the brilliance.

Your soul is now in the throes of raising the brilliance that is you individually and collectively. As each soul recognises this truth of being and comes into realignment in the frequency of this truth not only is the soul served, all souls are served. This energetic Cosmic Law is the way Quantum Leaps of evolution come into activation.

Dear ones with the potential to be brightest lights in the cosmos, we salute you in this time of change and great personal challenge / transition. For recognition that the ego self, serves not the soul self is becoming more widespread. Do not despair when you hear of, see, or understand that, areas of life on your planet are still under threat from the ego minds of those yet to understand the truth of self, and come into awareness of this truth. Accept that those of Humanity, the way showers, the path pavers, in energetic terms carried within their soul and at the level of their DNA, the Quantum leap of cosmic proportions for all life forms of the planet.

Quantum leaps in evolution require an energetic frequency trigger. Those of humanity who specifically incarnated into the physical experience with this frequency of evolution intact in DNA, requiring the frequency of Creator source

to activate the new understanding / awareness. Those of you thus carry great response ability for your own soul and all souls. And you are serving your purpose well. It is well done – it is being well done!

In very recent times 'social networking' has come to the fore on your planet. Social networking via the frequency of communication known to you as the internet carries significant soul purpose for mankind. The frequency of collective consciousness created this. A result of those who's understanding not yet in full awareness knowing, their soul frequency caused this to arise.

This physical aspect demonstrates the conscious collective of Humanity in communication.

In your near futures social networking will play a greater part in the collective raise in the frequency of light in Humanity.

Social networking will evolve into a tool of spiritual understanding not in conscious form at present.

Yet we say to you, to more fully understand, this tool also will become obsolete as your latent ancient abilities are re- awakened, remembered, re learned.
